# YDM3109

## Premium Proximity card Digital Door Lock with anti-panic

**Reliable**

**Convenient**

**Safe**

### Various access

Yale YDM3109 has three access solutions, PIN code, proximity card, or key for your convenience.

### Scrambling code

You can add meaningless numbers before or after the code when there is a chance of exposing your code to others.

### Operation status notification

Whenever any operation is made, the keypad informs you what has happened through different alignment of the numbers.

### Mechanical key override

For emergency, it can be unlocked with a mechanical key.

### Missing card invalidation

If you lose your card, it has no validation as long as you re-register the rest of your cards.

### Automatic locking

The Yale Digital Door Locks series automatically locks the door after checking it is properly closed. (Manual operation is also selectable)

### Anti-panic egress

For convenience and in case of emergency, the door is automatically unlocked whenever the inner lever handle is used.

### Safe handle

The button on the handle must be depressed before the lever will operate. This is a child safety feature as small children will have difficulty opening the door.

### Alarm (Break-in / Damage)

80dB alarm goes off if anyone attempts to damage the lock or force the door open.

### Low battery and emergency power

It warns in case of low battery with alarm and LED. When the batteries are completely discharged, you can easily supply power to the lock with a standard 9V battery.

### Remote Control (Optional)

Remote control type is also available. Wireless Floating ID technology is adopted and works up to 50m.

### YDM3109
